## A C K N O W L E D G M E N T S

I am indebted to Dr E.E. Chamberlain, Director of Plant Diseases Division, Department of Scientific and Industrial Research, for laboratory facilities, and to the Governments of New Zealand and Singapore for granting a Commonwealth Scholarship which made this research possible.

I wish to express my sincere appreciation to Dr F.J. Newhook for his invaluable supervision and guidance; Professor R.E.F. Matthews and Dr D.W. Dye for constructive advice and suggestions; Mr J.W. Endt for taking the photographs; the staff of Plant Diseases Division, Fruit Research Division, and fellow colleagues of Microbiology Department for helpful discussion and assistance; to my family I thank them for their patience and encouragement.

CHEE
