SATELLITE OBSERVATIONS OF IRREGULARITIES IN THE ANTARCTIC IONOSPHERE

by

G.F. Stuart

A thesis submitted to the
University of Auckland for
the degree of Doctor of
Philosophy in Radio Science

University of Auckland
Radio Research Centre
June 1968

A C K N O W L E D G E M E N T S

This work was carried out under Research Grant No. NsG-54-60 from the National Aeronautics and Space Administration, Washington, D.C. The recording equipment at Scott Base was installed, maintained and operated by the Antarctic Division of the D.S.I.R., for which I am very grateful. I would like to thank Dr. J.E. Titheridge for designing and building the equipment and also for most valuable discussions for which he was always readily available. I also appreciate very much the support and encouragement given to me throughout my university career by the Director and staff of the Physics and Engineering Laboratory, D.S.I.R. The University Grants Committee is gratefully acknowledged for assistance by way of a Postgraduate Scholarship.

Thanks are also due to the Superintendent of the Geophysical Observatory, D.S.I.R., for making available hourly scalings of ionogram data and ionogram films from Scott Base. The work that has been done by the analysts is greatly appreciated as is the typing of the thesis by my sister Mrs. L. Sherring.

G.F. Stuart.

Radio Research Centre.

June 1968.
