STUDIES ON THE RESPIRATION  
OF  
MANGROVE SEEDLINGS

H. A. Outred

Ph.D. Thesis  
Department of Botany  
University of Auckland  
July, 1973

#### ACKNOWLEDGEMENTS

I wish to acknowledge:

My supervisor, Dr. J.M.A. Brown, Professor V.J. Chapman, in whose department this research was carried out, and officers of the South Pacific Commission in Suva, Fiji, who collected and dispatched Bruguiera seedlings.

## CONTENTS

	Page
GENERAL INTRODUCTION	1
PLANT MATERIAL	4
SECTION A: Ecological and morphological aspects relating to physiology	5
I The seedling	6
II The mangrove swamp environment	9
III Seedling dispersal and establish- ment	11
SECTION B: The <u>Avicennia</u> pericarp	16
Introduction	17
Methods and results	19
Discussion	25
Conclusion	27
SECTION C: General methods of tissue preparation, respiratory gas analysis and assessment of metabolic pathways	32
Tissue preparation	33
Short-term gas exchange measurements	35
Long-term measurements of carbon dioxide output	36
Long-term measurements of metabolites	38
Short-term measurements of metabolites	39
Steam-distillation	40
Lactic acid estimation	41
Acetaldehyde estimation	43
Ethyl alcohol estimation	46

	Page
Pyruvate estimation	48
Estimation of total reducing sugars	50
-Keto acids - Extraction, separation and estimation	53
Amino acids and organic acids - extraction, separation and estimation	57
Analysis of inorganic phosphate	61
Phosphate esters	62
Oxidized and reduced nucleotides	63
Feeding of radioactive glucose	64
 SECTION D: Effects of external gas concentrations on mangrove respiration	 67
Introduction	68
Use of the Warburg method as an experimental technique	71
Methods	73
Results and Discussion	75
Respiration rate in humid <u>vs</u> wet conditions	90
Conclusion	95
 SECTION E: Short-term responses to low and zero oxygen tensions	 96
Introduction	97
The Pasteur effect	100
Methods and results	108
A. Barley	108
B. Mangrove tissues	110
Discussion	118
Conclusion	119
 SECTION F: Metabolic pathways. Studies with inhibitors	 120
General introduction	121

	Page
Malonic acid	
Introduction	122
Results	124
Discussion	142
2,4-dinitrophenol	
Introduction	150
Results	151
Discussion	171
Monoiodoacetic acid	
Introduction	174
Results	178
Discussion	183
Fluoride	
Introduction	187
Results	190
Discussion	199
Arsenite	
Introduction	202
Results	204
Discussion	210
Arsenate	
Introduction	213
Results	215
Discussion	219
General Discussion	220
Conclusion	224
 SECTION G:	
Metabolic pathways - Studies with labelled substrates. Assessment of respiratory pathways using specifically labelled glucose.	225
Introduction	226
Methods and results	227
Discussion and Conclusions	228

	Page
SECTION H: Metabolic pathways - Catabolism of ethanol	230
Introduction	231
Methods and results	235
Discussion	240
Conclusion	241
SECTION I: Particulate preparations	242
Introduction	243
Methods and results	247
Discussion	259
Conclusion	261
SECTION J: The isolation of a glycolytic preparation	262
Introduction	263
Methods and results	264
Discussion	277
Conclusion	278
SECTION K: An endogenous respiratory rhythm in <u>Bruguiera</u> seedlings	279
Introduction	280
Methods and results	281
Discussion	287
Conclusion	288
SECTION L: An analysis of metabolites	289
Introduction	290
Methods and results	300
Discussion	333
Conclusion	343
SECTION M: Esters in mangrove tissues	344
Introduction	345
Methods and results	346
Conclusion	347

	Page
GENERAL DISCUSSION	349
SUMMARY	353
ABSTRACT	355
APPENDICES	357
I Comparative respiration rates in various suspending media	358
II Tris buffer	364
III Tissue slices and the development of induced respiration	372
IV Extraction of <u>Avicennia</u>	384
V An analysis of the sugars from <u>Avicennia</u> cotyledons	387
VI Identification of sugars present in mangrove extracts	396
VII Chromatography of $\alpha$ -keto acids	402
VIII Extraction of lactic acid and efficiency of the steam distillation method.	406
IX Pentose phosphate pathway	411
BIBLIOGRAPHY	414
