STUDIES ON THE RIBONUCLEIC ACIDS
OF SUBCELLULAR FRACTIONS

P. L. BERGQUIST

A dissertation for the Degree of Doctor of Philosophy
University of New Zealand, April 1961.

ACKNOWLEDGEMENTS

The author wishes to express his gratitude to all those who aided in the completion of this work. Particular thanks are due to:-

Dr. R.E.F. Matthews and Professor V.J. Chapman for advice and encouragement during the course of the work.

The New Zealand branch of the British Empire Cancer Campaign for a generous grant for personal maintenance and biochemical reagents.

Drs. E.G. Bollard and R.L. Bielecki, Fruit Research Division, Department of Scientific and Industrial Research; Dr. R.K. Ralph, Plant Diseases Division, Department of Scientific and Industrial Research; Dr. J.W. Lyttleton, Plant Chemistry Division, Department of Scientific and Industrial Research; Dr. E.T. Bolton, Carnegie Institute of Washington; and Mrs. M. Colebrook for helpful advice and discussion.

Dr. G.B. Petersen, Plant Chemistry Division, Department of Scientific and Industrial Research, for advice on the chromatography of prostatic phosphomonoesterase.

Dr. J.F. Burton for advice and assistance in tumour implantation and for providing the animals used in the majority of the experiments reported here. I would also like to thank his Staff, Misses Maureen Beale, Lola Hindley, Heather Smyth and Mrs. Anne Parkinson, who have

cared for many of the animals during injection schedules.

Thanks are also due to Mr. S.A. Rumsey, Plant Diseases Division, Department of Scientific and Industrial Research, for taking the photographs in Plate 1 of this thesis.

TABLE OF CONTENTS

	Page	
Section I	Introduction and Abbreviations	1
Section II	General Methods and Materials	8
Section III	Methods of RNA estimation	24
Section IV	Location of RNA in the cell	76
Section V	The effects of tumour development on the base composition of subcellular RNAs from tumour and liver	108
Section VI	The occurrence and distribution of methylated purines in the RNA of subcellular fractions	115
Section VII	The incorporation of 8-azapurines into the RNA of subcellular fractions	163
Section VIII	The oxidative metabolism of mitochondria isolated from the livers of normal mice and mice injected with 8-azaguanine	221
Section IX	Some aspects of the biochemistry of mitochondrial RNA	270
Section X	Summary	327
	Literature cited	332
	Appendix I.
