THESIS SUBMITTED TO THE UNIVERSITY OF AUCKLAND

FOR THE DEGREE OF

DOCTOR OF PHILOSOPHY

A MODEL OF NEW ZEALAND'S POST-WAR INFLATION

V.B. Hall

Department of Economics
University of Auckland
June 1971
ACKNOWLEDGEMENTS

To the many people who have helped in any way with this thesis, I extend my sincere thanks.

I am grateful to those members, both past and present, of the Department of Economics for the training they have given me, and in particular, thanks go to Professor A.R. Bergstrom, Professor G.P. Braae, and Professor C.G.F. Simkin.

Special thanks in connection with this thesis go to my supervisors, Professor A.R. Bergstrom and Professor G.P. Braae. Both have given most freely and patiently of their time and advice. Mr H.J. Baas and Mr P.C.B. Phillips have also made helpful comments on aspects of the research. Any inadequacies or errors which may be present are, however, my own responsibility.

I am grateful to my father-in-law, Mr L.C. Hansen, for his valuable comments on grammar and style.

Mrs Janet Welford has typed a difficult script cheerfully and meticulously, and I sincerely appreciate her fine effort.

The Kellihier Economics' Foundation, through their Bursary, have provided, from September 1970, generous financial assistance.

I wish to thank my parents for the opportunity of a university education and for the interest and encouragement they have extended.

My greatest debt is to my wife, Elaine; her help and encouragement have made it possible to complete this research in the time available.
CHAPTER 1 - INTRODUCTION

CHAPTER 2 - PRICE MOVEMENTS IN NEW ZEALAND SINCE WORLD WAR II

2.1 Representation of Price Movements
2.2 Movements in the All Groups Consumers' Price Index since 1945

CHAPTER 3 - A BASIC THEORETICAL MODEL

3.1 The Approach
3.2 The Model Stated
3.3 The Model Explained
   3.31 The Equations and the Variables
       3.311 The Number of Equations
       3.312 The Variables
   3.32 Lag Structure
   3.33 The Price Equation
   3.34 The Actual Wage Equation
   3.35 The Minimum Wage Equation
   3.36 The Labour Demand Equation
   3.37 The Labour Supply Equation
   3.38 The Reduced Form Income Determination Equation
3.4 The Model in Estimation Form
3.5 Solution of the Model
   3.51 The "Equilibrium" Values
   3.52 The Characteristic Dynamic Properties
CHAPTER 4: ESTIMATION AND REVISION OF THE BASIC ANNUAL MODEL

4.1 The Approach to Estimation
4.2 The Basic Model
4.3 The Basic Cobb-Douglas Production Function Model
   4.31 Theory
   4.32 Estimation
4.4 The Explicit Introduction of Fixed Capital
   4.41 Fixed Capital Represented
   4.42 Fixed Capital Explained
4.5 The Theoretical Fixed Capital Models
   4.51 The CES Production Function Model
   4.52 The Cobb-Douglas Production Function Model
4.6 Simultaneous Equation Estimation
   4.61 The CES Production Function Model
   4.62 The Cobb-Douglas Production Function Model
4.7 The Parameter k Constrained
   4.71 Theory
   4.72 The CES Production Function Model
   4.73 The Cobb-Douglas Production Function Model
4.8 Simultaneous Equation Estimation
   4.81 The CES Production Function Model
   4.82 The Cobb-Douglas Production Function Model
   4.83 The Model Selected
4.9 The Nonconstant Returns to Scale CES Production Function Model
4.10 The Harrod-Neutral CES Production Function Model
4.11 Limited Information Maximum Likelihood Estimation
