THESIS SUBMITTED TO THE UNIVERSITY OF AUCKLAND

FOR THE DEGREE OF

DOCTOR OF PHILOSOPHY

A MODEL OF NEW ZEALAND'S

POST-WAR INFLATION

V.B. Hall

Department of Economics

University of Auckland

June 1971

ACKNOWLEDGEMENTS

To the many people who have helped in any way with this thesis, I extend my sincere thanks.

I am grateful to those members, both past and present, of the Department of Economics for the training they have given me, and in particular, thanks go to Professor A.R. Bergstrom, Professor G.P. Braae, and Professor C.G.F. Simkin.

Special thanks in connection with this thesis go to my supervisors, Professor A.R. Bergstrom and Professor G.P. Braae. Both have given most freely and patiently of their time and advice. Mr H.J. Baas and Mr P.C.B. Phillips have also made helpful comments on aspects of the research. Any inadequacies or errors which may be present are, however, my own responsibility.

I am grateful to my father-in-law, Mr L.C. Hansen, for his valuable comments on grammar and style.

Mrs Janet Welford has typed a difficult script cheerfully and meticulously, and I sincerely appreciate her fine effort.

The Kelliher Economics Foundation, through their Bursary, have provided, from September 1970, generous financial assistance.

I wish to thank my parents for the opportunity of a university education and for the interest and encouragement they have extended.

My greatest debt is to my wife, Elaine; her help and encouragement have made it possible to complete this research in the time available.

CONTENTS

CHAPTER 1 - INTRODUCTION	1
CHAPTER 2 - PRICE MOVEMENTS IN NEW ZEALAND SINCE WORLD WAR II	
2.1 Representation of Price Movements	27
2.2 Movements in the All Groups Consumers' Price Index since 1945	44
CHAPTER 3 - A BASIC THEORETICAL MODEL	
3.1 The Approach	48
3.2 The Model Stated	50
3.3 The Model Explained	
3.31 The Equations and the Variables	
3.311 The Number of Equations	55
3.312 The Variables	58
3.32 Lag Structure	66
3.33 The Price Equation	70
3.34 The Actual Wage Equation	90
3.35 The Minimum Wage Equation	102
3.36 The Labour Demand Equation	105
3.37 The Labour Supply Equation	116
3.38 The Reduced Form Income Determination Equation	120
3.4 The Model in Estimation Form	134
3.5 Solution of the Model	137
3.51 The "Equilibrium" Values	139
3.52 The Characteristic Dynamic Properties	141

CHAPTER 4 - ESTIMATION AND REVISION OF THE BASIC ANNUAL MODEL

4.1	The Approach to Estimation	151
4.2	The Basic Model	154
4.3	The Basic Cobb-Douglas Production Function Model	
4.31	Theory	174
4.32	Estimation	179
4.4	The Explicit Introduction of Fixed Capital	
4.41	Fixed Capital Represented	181
4.42	Fixed Capital Explained	184
4.43	Theoretical Fixed Capital Models	
4.431	The CES Production Function Model	189
4.432	The Cobb-Douglas Production Function Model	193
4.44	Simultaneous Equation Estimation	200
4.441	The CES Production Function Model	201
4.442	The Cobb-Douglas Production Function Model	201
4.5	The Parameter k Constrained	206
4.51	Theory	
4.511	The CES Production Function Model	208
4.512	The Cobb-Douglas Production Function Model	211
4.52	Simultaneous Equation Estimation	215
4.521	The CES Production Function Model	217
4.522	The Cobb-Douglas Production Function Model	218
4.523	The Model Selected	220
4.6	The Nonconstant Returns to Scale CES Production Function Model	225
4.7	The Harrod-Neutral CES Production Function Model	233
4.8	Limited Information Maximum Likelihood Estimation	236

CHAPTER 5 - SOME FURTHER ESTIMATIONS: SEMI-ANNUAL DATA, AND A
DIFFERENTIAL EQUATION SYSTEM

5.1	Semi-annual Data	
5.11	The Approach to Estimation	248
5.12	Ordinary Least Squares Estimation	249
5.13	Simultaneous Equation Estimation	
5.131	Estimation by Two Stage Least Squares	258
5.132	Estimation by Limited Information Maximum Likelihood	263
5.2	A Differential Equation System	265

CHAPTER 6 - CONCLUSION

6.1	The Most Satisfactory Model	274
6.11	Dynamic Properties	
6.111	Characteristic Dynamic Properties	279
6.112	Responses to Selected Exogenous Shocks	282
6.12	Predicting Power	292
6.2	Summary of Principal Findings	309
