FORM-FOCUSED INSTRUCTION
IN L2 FRENCH

ROSEMARY MAY ERLAM

A THESIS SUBMITTED FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
THE UNIVERSITY OF AUCKLAND, 2003
DEPARTMENT OF APPLIED LANGUAGE STUDIES
AND LINGUISTICS

ABSTRACT

While substantial evidence lends support to an explicit focus on form in language programme design, there is a need for systematic investigation of the relative effectiveness of subtypes of explicit L2 instruction (Norris & Ortega, 2000). This study considers planned approaches to form-focused instruction, that is, focus-on-forms (Long, 1991). It contrasts grammar instruction that is deductive (i.e., involving rule presentation and metalinguistic information) with instruction that is inductive (i.e., instruction that focuses student attention on form but includes no rule presentation).

Language instruction traditionally focuses on giving students opportunities to produce the particular language forms that have been the focus of instruction. Recent research claims that instruction that gives students the opportunity to process language input is more effective (e.g., VanPatten, 1996, 2002a). This study compares the relative effectiveness of structured input and output-based instruction.

Most research investigates the effectiveness of instruction in terms of overall group gains. A particular instructional method may not, however, benefit all learners uniformly. This study establishes whether there is any relationship between the effectiveness of the instructional methods investigated and learner aptitude.

The study was conducted in a New Zealand high school and the structure targeted was direct object pronouns in L2 French. Students ($N = 92$) were assigned to four groups: (a) structured input instruction; (b) output-based/deductive instruction; (c) inductive instruction (input/output-based); (d) control. They were assessed on listening

comprehension, reading comprehension, written production and oral production tasks. All but one of these language measures required a pressured response. Students were also assessed on measures of language aptitude: (a) language analytic ability, (b) phonemic coding ability and (c) working memory.

Results reveal significantly greater gains for the Deductive instruction group than for the Inductive instruction group. The students who received output-based instruction also performed better overall than the students who received structured input instruction. There is some evidence to suggest that deductive instruction that gives students the opportunity to produce language output may level out individual differences in language aptitude.

With respect to the testing procedures used, the study highlights the difficulty of designing language measures that access implicit language knowledge.

To my father

who has always loved and supported me
and championed all my academic
endeavours.

ACKNOWLEDGEMENTS

This thesis would not have been possible without the help of many individuals. In particular I would like to thank the following.

Professor Rod Ellis, firstly, for giving me the confidence to believe in my abilities and secondly for the excellent scholarship that has guided and inspired me throughout the study.

Glenn Ekambi for her friendship and support and, in particular, her help with all the practical details of the study: design of instructional and testing materials and careful editing of many documents.

Heather Richards and the teachers at the school where the study was conducted, who made this study possible and helped me with numerous practical details.

My colleagues of the Department of Applied Language Studies and Linguistics, many of whom have given me valuable help and advice and all of whom have contributed to creating an environment supportive of research.

Those colleagues in the French department who assisted me with the pilot study and/or the main study and without whose help neither would have been possible.

The French department of the University of Auckland for providing the financial assistance that I needed to carry out the study.

The Foundation for Science, Research and Technology for providing me with a Bright Futures Scholarship, allowing me to concentrate on my doctoral studies.

TABLE OF CONTENTS

ABSTRACT.....	ii
ACKNOWLEDGEMENTS.....	v
LIST OF FIGURES.....	xiv
LIST OF TABLES.....	xv
LIST OF ACRONYMS.....	xviii
CHAPTER ONE INTRODUCTION.....	1
1.1 Overview.....	1
1.2 Definition of terms.....	1
1.2.1 Form-focused instruction.....	1
1.2.2 Implicit/explicit language knowledge.....	2
1.3 A historical overview of form-focused instruction.....	3
1.4 The case for form-focused instruction.....	4
1.5 Assessing explicit and implicit language knowledge.....	7
1.6 Second language teaching within the New Zealand context.....	9
1.7 Form-focused instructional approaches.....	11
1.8 Thesis outline.....	12
CHAPTER TWO DEDUCTIVE AND INDUCTIVE INSTRUCTION.....	15
2.1 Overview.....	15
2.2 Definition of terms.....	15
2.3 Research in deductive and inductive instruction.....	16
2.3.1 Operationalisation of instructional treatments.....	17
2.3.2 Inductive instruction practice activities.....	20
2.3.3 Deductive instruction practice activities.....	21
2.3.4 Choice of target structure.....	21

2.3.5 Target population.....	22
2.3.6 Assessment of instructional treatments.....	22
2.3.7 Investigation of effectiveness of instruction in relation to individual learner differences.....	23
2.3.8 Results of research conducted to date.....	23
2.3.9 Limitations of deductive/inductive research.....	24
2.4 Conclusions.....	24
CHAPTER THREE STRUCTURED INPUT INSTRUCTION.....	27
3.1 Overview.....	27
3.2 Input versus output-based instruction.....	27
3.3 Input-based instruction.....	29
3.4 Input processing instruction and structured input instruction defined.....	30
3.5 Input processing instruction.....	31
3.5.1 Research in input processing instruction.....	33
3.5.2 Criticism of input processing instruction.....	36
3.6 Structured input instruction.....	38
3.6.1 Research in structured input instruction.....	40
3.7 Conclusion.....	49
3.7.1 Input processing research.....	49
3.7.2 Structured input instruction.....	49
CHAPTER FOUR LANGUAGE APTITUDE.....	51
4.1 Overview.....	51
4.2 Relationship between language aptitude and instructional outcomes.....	51
4.3 Components of language aptitude.....	52
4.4 Phonemic coding ability.....	55
4.5 Language analytic ability.....	55

4.6 Memory.....	56
4.6.1 Working memory.....	57
4.6.1.1 The central executive.....	57
4.6.1.2 The phonological loop.....	58
4.6.2 The importance of working memory in second language acquisition.....	62
4.7 Research investigating aptitude by treatment interaction.....	63
4.8 Conclusion.....	66
CHAPTER FIVE METHODOLOGY.....	68
5.1 Overview.....	68
5.2 Research questions.....	68
5.2.1 Deductive instruction (output-based) /inductive instruction (input/output-based).....	68
5.2.2 Structured input instruction /output-based instruction.....	69
5.2.3 Language aptitude.....	69
5.3 Pilot study.....	70
5.3.1 Participants.....	70

5.3.5 Results.....	79
5.3.6 Discussion.....	80
5.4 The main study.....	82
5.4.1 Participants.....	82
5.4.2 Target structure.....	85
5.4.3 Procedure.....	85
5.4.4 Instructional treatments.....	89

5.4.4.1 Deductive instruction (output-based) versus Inductive instruction (input/output-based).....	89
5.4.4.2 Structured input instruction versus Output-based instruction.....	90
5.4.4.3 Explicit information.....	91
5.4.4.4 Input-based activities.....	92
5.4.4.5 Production activities.....	96
5.4.4.6 Sequence of activities.....	97
5.4.4.7 Control group.....	98
5.4.5 Testing.....	99
5.4.5.1 Listening comprehension test.....	101
5.4.5.2 Reading comprehension test.....	103
5.4.5.3 Written production test.....	104
5.4.5.4 Oral production test.....	106
5.4.5.5 Test reliability and validity.....	109
5.5 Language aptitude.....	112
5.5.1 Testing.....	114
5.5.1.1 Language analytic ability.....	114
5.5.1.2 Phonemic coding ability.....	116
5.5.1.3 Working memory.....	117
CHAPTER SIX DEDUCTIVE VS. INDUCTIVE INSTRUCTION.....	122
6.1 Overview.....	122
6.2 The instructional process.....	122
6.3 Results.....	125
6.3.1 Summary of results.....	133
6.4 Discussion.....	135
6.4.1 Overall comparison of performance of Deductive and Inductive groups with the Control group.....	135
6.4.2 Effects of deductive and inductive instruction on comprehension of the target structure.....	137

6.4.3. Effects of deductive and inductive instruction on production of the target structure	138
6.4.4 Effects of deductive and inductive instruction on learning of morphological and syntactical language features	139
6.4.5 Variability in scores	141
6.4.6 Maintenance of gains over testing episodes	143
6.5 Conclusion	143

CHAPTER SEVEN STRUCTURED INPUT VS. OUTPUT-BASED

INSTRUCTION.....	146
7.1 Overview.....	146
7.2 The instructional process	146
7.2.1 Structured input instruction and input processing instruction differentiated.....	146
7.3 Results.....	148
7.3.1 Summary of results	158
7.4 Discussion.....	161
7.4.1 Comparison of performance of Structured input and Control groups	161
7.4.2 Comparison of performance of Output-based instruction and Control groups	162
7.4.3 Comparison of performance of Structured input and Output-based instruction groups.....	163
7.4.4 Effects of structured input instruction and output-based instruction on learning of morphological and syntactical language features.....	171
7.4.5 Conclusion	172

CHAPTER EIGHT RELATIONSHIP BETWEEN INSTRUCTIONAL METHODS AND MEASURES OF LANGUAGE APTITUDE.....

175	
8.1 Overview.....	175
8.2 Measures of language aptitude	175

8.3 Analysis of data	179
8.4 Results.....	181
8.4.1 Results for group as a whole.....	181
8.4.2 Results for Output-based instruction group.....	182
8.4.3 Results for Structured input group.....	184
8.4.4 Results for Inductive instruction group	189
8.4.5 Summary of results	191
8.5 Discussion.....	193
8.5.1 Relationship of independent variables.....	193
8.5.2 Correlations between language aptitude and instructional outcomes for group as a whole.....	194
8.5.3 Relationship between output-based instruction and language aptitude.....	194
8.5.4 Relationship between structured input instruction and language aptitude ..	195
8.5.5 Relationship between inductive instruction and language aptitude.....	199
8.5.6 Relationship between results and test design.....	201
8.5.7 Results for memory test designed to assess storage of information	202
8.6 Conclusion	204
 CHAPTER NINE CONCLUSION	 207
9.1 Overview.....	207
9.2 Summary of main findings	207
9.2.1 Research question 1.....	207
9.2.2 Research question 2.....	208
9.2.3 Research question 3	209
9.3 Theoretical implications of research findings.....	210
9.3.1 Input.....	210
9.3.1.1 Positive versus negative evidence.....	210
9.3.1.2 Input processing instruction.....	213
9.3.2 Output	215
9.3.3 Form-meaning mappings	215

9.3.4 Language aptitude.....	216
9.3.4.1 Skehan’s model of language aptitude	217
9.3.4.2 Working memory	217
9.3.4.3 Language aptitude and input processing research	218
9.3.5 Summary of theoretical implications of research	219
9.4 Methodological issues raised by research.....	220
9.4.1 Difficulty of measuring implicit language knowledge	220
9.4.2 Difficulty of distinguishing between input and output instruction.....	221
9.4.3 Difficulty of conducting experimental classroom research	222
9.5 Pedagogical implications of research findings	223
9.6 Limitations	225
9.7 Future research directions	226
9.8 Conclusion	227
