## Corrigendum: Fish oil supplements in New Zealand are highly oxidised and do not meet label content of n-3 PUFA

Benjamin B. Albert, José G. B. Derraik, David Cameron-Smith, Paul L. Hofman, Sergey Tumanov, Silas G. Villas-Boas, Manohar L. Garg & Wayne S. Cutfield

*Scientific Reports* 5:7928; doi: 10.1038/srep07928; published online 21 January 2015; updated on 07 November 2016

This Article contains typographical errors.

In the 'PV, AV, and Totox' section of the Methods, the formula for the p-anisidine value reads " $10 \times [1.2 \times (A_2 - A_1)]/m$ " but should read " $[10 \times (1.2 \times A_2 - A_1)]/m$ ".

The calculations used to derive peroxide value (PV) produced a concentration in meq/kg and not in meq/l as stated in the Article. "meq/l" should read "meq/kg" in the first and third paragraphs of the 'PV, AV, and Totox' section in the Methods; and in the title of Table 3, and the headings of columns 9 and 10 in Table 3.
