Academic Editor: George A. Calin

Published: 20 June 2016

The authors wish to make the following correction to this paper [1]. Reference 28 has been renumbered to 29, and the following affirmation in the original text: “Dezhong *et al.* have demonstrated that miR-150 was overexpressed in PCa cells at both the mRNA and protein levels” has been substituted by: “Waltering *et al.*, 2011, reported that miR-150* along with three other miRNAs, namely, miR-10a, miR-141, and miR-1225-5p, among 17 miRNAs, expressed to have >1.5- fold changes at the expression levels in PCa cells and in a minimum of two intact-castration xenograft pair. It has been shown that miR-150 was overexpressed in PCa cells.”

Thereby, we include the research done by another group—Waltering *et al.*, 2011—who also found interesting results working on PCa cell-lines and xenografts and the effect of miRNAs (reference no. 31 in the edited version).

References 29 and 30 were initially cited unintentionally on page 2 of the article. These references have been deleted from page number 2 and renumbered to 38 and 39 on page 3.
