TITLE

**PATTERNS OF STABILITY AND CHANGE ORIENTATIONS IN
ORGANISATIONAL CULTURE: A CASE STUDY**

Richard Noel Burchell

**‘A thesis submitted in partial fulfilment of the requirements for the
degree of Doctor of Philosophy, The University of Auckland, 2004’**

ABSTRACT

There is a fundamental need of all organisations to exhibit both stability and change behaviours in order to survive in the long term, particularly when operating in competitive environments. This duality may seem paradoxical and contradictory, but these interactions are necessary for sustainable organisational continuity. Stability and change should be considered in concert rather than focussing on change at the expense of stability. It is proposed that cultural manifestations can develop over time that directly or indirectly reflect organisational concerns with stability and change, and can be investigated as two key cultural dimensions.

The aim of this study was to discover how and why organisational members associated their culture with the dimensions of stability and change. Interpretations of these associations provide support for the two dimensions being viewed as separate, but also being complementary and interdependent in nature. This differs from previous perspectives in the literature that portray the dimensions as being on a single dimension.

This in-depth study was conducted in a single New Zealand business organisation. It shows how cultural orientations towards stability and change can be discerned as patterns. Associations by organisational members of cultural manifestations with the dimensions of stability and change was explored utilising a triangulation research design incorporating Concept Mapping and Pattern Matching, semi-structured interviews and observations as research methods. Pattern Matching is a technique that has not been previously employed in cultural research and the findings suggest the technique can be a useful tool in cultural analysis.

The study showed that members found culture, and in particular its associations with stability and change, a somewhat challenging concept to articulate. This study also supports the need for the dimensions of stability and change to be viewed as being dynamic and interconnected. Nonetheless, a proposed typology was developed based on the premise that these dimensions are conceptually separate. It shows promise for better understanding the influence of culture on patterns of stability and change within organisations.

ACKNOWLEDGEMENTS

There are many people and organisations I would like to thank for their guidance and support for the completion of this thesis.

A special thanks to the Zipco organisation for allowing me to conduct this study within their firm, particularly as time is precious in this fast-paced company. Much support and cooperation was received from the staff during the time I spent within its various operations. Thanks also to the staff who participated in the study, particularly those on the focus group and the interviewees.

I would like to thank my supervisor, Dr Darl Kolb, for his guidance, support and encouragement in my studies, particularly in providing feedback on my many conceptual explorations.

This study was greatly assisted by the advice from Mary Kane at Concept Systems and Professor Bill Trochim at Cornell University regarding the application of Concept Mapping to this study.

Thanks to the staff in the Faculty of Business and School of Management and Entrepreneurship at UNITEC Institute of Technology for their support, advice and general encouragement. Particular thanks to Professors Howard Frederick, Gael McDonald and Pieter Nel, Dr Phillip Bretherton, Peter Carswell, Helen Mitchell and Dr Ken Simpson.

Special thanks to my daughters Catherine and Samantha, and particularly my wife Lyn who supported me in my efforts and endured the many disruptions caused through the pursuit of this PhD.

Finally I would like to dedicate this PhD to my parents, Ward and Norma Burchell, who unfortunately both passed away since my commencement on this PhD journey. They both showed dedication to achieving goals and displayed courage when faced with declining health.

CHAPTERS

Chapter One: Introduction

1.1	Background to the research	1
1.2	Research problem	4
1.3	Justification and contribution of this research	6
1.4	Methodology	8
1.5	Outline of the thesis	8
1.6	Definition of major terms	10
1.7	Delimitations of the research	12
1.8	Conclusions	13

Chapter Two: Literature Review

2.1	Introduction	14
2.2	Stability and change in organisations	17
2.2.1	Organisational stability	17
2.2.2	Organisational change	18
2.2.3	Organisational stability and change	21
2.2.4	Relationships between organisational stability and change	27
2.3	Organisational culture	34
2.3.1	Definitions and characteristics of organisational culture	38
2.3.2	Cultural development, socialisation and components of culture	44
2.3.3	Perspectives, issues and controversies in culture	48
2.3.4	Cultural effects on the organisation	55
2.3.5	Cultural dimensions, multidimensionality and typologies	62
2.3.6	Cultural stability and change	66
2.4	Organisations, culture, stability and change	70
2.4.1	Issues in organisation, culture, stability and change	71
2.4.2	Cultures that facilitate change	71
2.4.3	Relationship between organisation and culture concerning stability and change	73
2.4.4	Investigating the cultural dimensions of stability and change	78
2.4.5	Profiling cultural orientations to stability and change	81
2.5	Researching culture and the cultural dimensions of stability and change	84
2.6	Conclusions	89

<u>Chapter Three: Research Methodology</u>	Page
3.1 Introduction	92
3.1.1 Purpose of the study	92
3.1.2 Research aims	93
3.1.3 Methodological and methods choices	94
3.2 Research methodology for this study	94
3.2.1 Nature of culture and the research questions	97
3.2.2 Research issues in this study	100
3.3 The research design	107
3.3.1 Mixed research design	107
3.4 Methods for data collection and analysis	109
3.4.1 Triangulation	110
3.4.2 Concept Mapping and Pattern Matching	110
3.4.3 Semi structured interviews	112
3.4.4 Observations	113
3.4.5 Informal discussions	113
3.4.6 Data analysis	113
3.4.7 Pilot study	114
3.5 Research procedures	116
3.5.1 Selection of the case organisation	116
3.5.2 Negotiating the process	118
3.5.3 Concept Mapping and Pattern Matching procedures	119
3.5.4 Statistics generation	131
3.5.5 Semi structured interviews	131
3.5.6 Observations and secondary data	134
3.6 Research result issues	135
3.6.1 Trustworthiness of the results	135
3.6.2 Reporting the research findings	140
3.7 Ethical considerations	142
3.8 Conclusions	144

Chapter Four: Results and Analysis of Data

4.1 Introduction	146
4.2 The case organisation	147
4.3 Findings	151
4.3.1 Issues in Concept Mapping and Pattern Matching results	151
4.3.2 Semi structured interviews, observations and secondary data	152
4.4 The culture of Zipco	153
4.4.1 Members' perceptions of the Zipco culture	153
4.4.2 Interpretation by the researcher of the Zipco culture	162
4.4.3 Summary of findings concerning the nature of the Zipco culture	170
4.4.4 Discussions on the findings concerning the culture of Zipco	171
4.5 Findings concerning research question one	173
4.5.1 Main Findings: Reporting Insider Interpretations	173
4.5.2 Interpretations by the researcher	183
4.5.3 Discussion on the findings	194

	Page
4.6 Findings concerning research question two	200
4.6.1 Interviewees' perceptions of patterns of stability and change	201
4.6.2 Interpretations by the researcher	209
4.6.3 Main findings concerning this research question	213
4.6.4 Discussions on the findings	214
4.7 Findings concerning research question three	216
4.7.1 Strengths of Concept Mapping and Pattern Matching	216
4.7.2 Discussion on the findings	217
4.7.3 Issues in Pattern Matching	218
4.8 Conclusions about the research questions	220
4.8.1 Conclusions concerning research question one	220
4.8.1 Conclusions concerning research question two	220
4.8.1 Conclusions concerning research question three	221
 <u>Chapter Five: Conclusions and Implications</u>	
5.1 Introduction	224
5.2 Conclusions about the research problem	226
5.2.1 The research problem	226
5.2.2 How do these findings go beyond the literature	227
5.2.3 How will these findings contribute to the understanding of culture	230
5.3 Implications for cultural theory	231
5.4 Implications for practice	236
5.5 Research limitations	240
5.6 Implications for further research	242
