FRONTISPIECE:

Slump folding on a large scale in normal Waitemata beds at G.R. 339920 about three quarters of a mile west of Huaroa Point.
# TABLE OF CONTENTS

## CHAPTER I. INTRODUCTION

| Location | 2 |
| Map Coverage | 2 |
| Physiography | 4 |
| Synopsis of Geology | 5 |
| Aims of Study | 5 |
| Previous Work | 6 |
| Terminology | 6 |

## CHAPTER II. STRATIGRAPHY: AGE: STRUCTURE

| The Stratigraphic Succession | 13 |
| Thickness of Waitemata Beds | 13 |
| Age of Waitemata Beds | 19 |
| Conclusions | 19 |

## CHAPTER III. INTRAFORMATIONAL DEFORMATION: PENECONTemporaneous SLUMPING

| Small Scale Deformation | 32 |
| Large Scale Deformation | 39 |
| Discussion: Cause and Style of Deformation | 47 |
| Clastic (Sedimentary or Neptunian) Dykes | 58 |

## CHAPTER IV. SEDIMENTARY STRUCTURES OF THE NORMAL WATTEMATA BEDS

| The Turbidite Rhythm | 61 |
| Variations from the Typical Turbidite Rhythm | 81 |
| The Interturbidite Sequence | 87 |
| Discussion on Cross Bedding | 88 |
| Laminites | 95 |
| Featureless Thick Sandstones | 96 |

## CHAPTER V. PETROGRAPHY OF THE NORMAL WATTEMATA BEDS

| Rock Types | 100 |
| Detrital Mineralogy | 103 |
| Diagenesis | 108 |
| Provenance | 110 |
| Grain-Size Analysis | 112 |
CHAPTER VI  PALEOCURRENTS

Basal Markings  115
Intrastratal Structures  116
Ripple Marks  117
Comments Upon Current Directions Recorded from 200 Sandstone Beds  123
Discussion  128

CHAPTER VII  TURBIDITES - LAMINITES- TRACTIVE SANDSTONES: A DISCUSSION

Turbidites  130
Laminites  135
Tractive Sandstones  136

CHAPTER VIII  WHANGAPARAOA GRIT BEDS

Introduction  139
Primary (or Depositional) Features  145
Petrography  160
Fossils of the Grits  165
Paleoecological and Paleo-environmental Implications of These Fossils  170
Emplacement and Provenance  172
Large Blocks (or "Horste") of Basalt Associated with the Grits  181

CHAPTER IX  TRACE FOSSILS

Introduction  186
Systematic Description  187
Discussion  207

CHAPTER X  PALEOGEOGRAPHY DURING WAI TEMATA TIMES  212

Appendix I  SHORE PLATFORMS  221

ACKNOWLEDGEMENTS  224
